Coding cards

These cards offer starting points as you create with OctoStudio. Each card shows example code to try and explore as you make your own projects.

OctoStudio was created by the Lifelong Kindergarten group at MIT Media Lab. To learn more, visit octostudio.org.

Mobile layout adapted by Circuit Kids from the official OctoStudio Coding Cards v3.0 (August 2026). Block diagrams and English app labels are unchanged.

Source and this card adaptation: Creative Commons CC BY-NC-SA 4.0. Attribution required, non-commercial use only, share adaptations under the same licence.
